

Individual Reflection

Week 5

Felix Oliv

What do I want to learn or understand better?

Current situation

I still feel like I know more than the average in our group, this means that it's hard to continue learning because if I do the "knowledge gap" will increase and it will be even harder to get everybody on the same page

Goal

Same as last week, my focus lies on the agile software development process as a whole.

Plan

I will try to contribute as much as I can to our sprint meetings so that we can gain as much as possible from them.

How can I help someone else, or the entire team, to learn something new?

Current situation and goal

Same as last week.

Plan

Same as last week. The strategy seems to have worked so we are sticking with it this sprint as well.

What is my contribution towards the team's use of Scrum?

Current situation

I completed my user story assigned to me.

Goal

The goal is that we have well structured user stories with detailed tasks.

Plan

I will try to split my user story into smaller tasks.

What is my contribution towards the team's deliveries?

I created the model for the different components that a challenge is going to have. A challenge should be able to track scores in different ways and that's what the components are used for. So far there is a counter component, a distance component and a date component.

I have also been assigned the role as github master and now have the responsibility to merge and fix merge conflicts for all pull requests
