

EIGHTH WEEK

- What do I want to learn or understand better?

I want to learn how to do a project differently, how to improve the process and how much difference it makes. To achieve this I just have to be more eager to talk about all the soft values and the process of implementing the different tips I got during this process. During the last sprints the project did go smoother but I believe it can be even smoother.

- How can I help someone else, or the entire team, to learn something new?

To reflect and tell my perspective during the final reflection. This is a great moment for all of us to help each others perspective to improve until next time.

- What is my contribution towards the team's use of Scrum?

Not much left on the scrum except the final reflection to be done.

- What is my contribution towards the team's deliveries?

By doing my work on time, and looking at others' comments to discuss them. The work on the final reflection is really a team effort so everybody has to do their part.
