

FIFTH WEEK

- What do I want to learn or understand better?

How to dynamically change the view, I've done it before but with a different structure.

- How can I help someone else, or the entire team, to learn something new?

As every week, I want to help others. I like the feeling of helping others and hear the "aaaaaaaaaaaaahhhh". And as always I say if they ever get stuck they can ask, and it seems to work.

- What is my contribution towards the team's use of Scrum?

Helping assign different values of Estimation of effort and Story points to user stories and, as every week, doing my user story.

- What is my contribution towards the team's deliveries?

By doing my work, this week was a little bit harder since I didn't know how to solve some problems so I got some help from a friend. But I hopefully learned some so I can improve my deliveries in the future.
