

## FOURTH WEEK

- What do I want to learn or understand better?

How to couple the View and the Model, I thought i knew how to do it but one of the participants in my group said that it is harder than i thought. To get there we will cooperate to solve the problem.

- How can I help someone else, or the entire team, to learn something new?

As every week, I want to help others. I like the feeling of helping others and hear the “aaaaaaaaaaaaahhhh”. And as always I say if they ever get stuck they can ask, and it seems to work. I have gotten some questions and helped several times this week.

- What is my contribution towards the team's use of Scrum?

Helping assign different values of Estimation of effort and Story points to user stories and, as every week, doing my user story.

- What is my contribution towards the team's deliveries?

Doing my part of the work, assigned each sprint. Except doing my part I can help others if I know why someone else might have problems with solving their work. I also bring up work that I think should be done before something else because, knowing from my experience, will make the workload easier.
