

## Individual Reflection

### Week 2

Felix Oliv

What do I want to learn or understand better?

#### **Current situation**

At the moment we have only started doing our first mockup for the project. We also did the workshop where we learned how to plan and execute a sprint. However I think we were a bit off and either over or underestimated our effort estimation.

#### **Goal**

My goal is still the same as last week but I would like to focus on getting better at doing effort estimations.

#### **Plan**

The plan is similar to last week with the addition that We could try to make our user stories as clear as possible to more easily be able to make an effort estimation.

How can I help someone else, or the entire team, to learn something new?

#### **Current situation and goal**

Exactly the same as last week. I believe that my skills outside of coding can be lacking, for example using trello and making user story, and I would like to be better at those things.

#### **Plan**

I will try to learn as much as possible from the lectures as well as from team members that are better than me at those things.

What is my contribution towards the team's use of Scrum?

We have pretty much only created a trello page so far.

What is my contribution towards the team's deliveries?

So far we have worked together. This week we did our first mockup as well as working on our business model and project scope.
