

## FORTH WEEK

- what do I want to learn or understand better?

This still stands.

I want to learn how to be a highly productive and functioning part in an IT project. Today I think of myself as a well functioning participant in IT projects but want to push myself further. I can reach this goal by contributing more and working on my cooperation skill.

- how can I help someone else, or the entire team, to learn something new?

If I feel there is something I could teach, I can take action and actually make myself heard to teach it. Today I think I am ok at taking action in these moments. To be better at it I could be more mindful and notice when I possess knowledge that could help and teach someone else.

- what is my contribution towards the team's use of Scrum?

Participated in scrum-planning and talked about estimation effort and different ways to measure work. Worked on my user story until my computer crashed.

- what is my contribution towards the team's deliveries?

I have participated in Team reflection and helped by starting starting page user story. Unfortunately my computer crashed so i couldn't finish my code but i could still participate in team meetings. I want to contribute the same if not more next

week. I will do this by spending more time and putting in more of an effort.
