

## **FIRST WEEK**

- What do I want to learn or understand better?

I want to understand how to apply math and logic to real life problems, to make use of my knowledge in an impactful way. I haven't really done that before, not on a level I want to be able to, and one way to learn is by trial and error.

- How can I help someone else, or the entire team, to learn something new?

We haven't started but I really want to help others get better at something, and one way is to just be kind and patient with others. If they fail, I can be there and help them if the problem is within my knowledge.

- What is my contribution towards the team's use of Scrum?

We don't have a Scrum at the moment so I can't really answer this question this week.

- What is my contribution towards the team's deliveries?

To deliver myself and to help others when they get stuck on an assignment. We haven't really started yet so I can't really answer this yet. But in the planning it went well and I think I contributed.

## **SECOND WEEK**
