

# Individual Reflections

## Week 1

### What do I want to learn or understand better?

**(A) Current Situation:** There is nothing yet to learn as we haven't gotten an acceptance on our project idea yet.

**(B) Desired Situation:** That the idea is accepted, and we can start planning on how we are going to work.

**(A→B) Plan to get there:** To prepare for the idea to be accepted, I can ask our potential stakeholder for information on how they want the app to function etc. This makes it quicker for the team to start working and planning when the idea gets accepted.

### How can I help someone else, or the entire team, to learn something new?

**(A) Current Situation:** Some of the team are unfamiliar with the GitHub and Android Studio. Felix has offered himself to explain how to use them.

**(B) Desired Situation:** Everyone in the team is somewhat comfortable with using the both.

**(A→B) Plan to get there:** I can help Felix show how to use GitHub and Android Studio so that everyone learns quicker.

### What is my contribution towards the team's use of Scrum?

**(A) Current Situation:** As of now, we haven't started using Scrum.

**(B) Desired Situation:** When we start, then I shall have contributed my part of the Scrum.

**(A→B) Plan to get there:** Wait, until we begin with Scrum.

### What is my contribution towards the team's deliveries?

**(A) Current Situation:** Some of the team are unfamiliar with the GitHub and Android Studio. Felix has offered himself to explain how to use them.

**(B) Desired Situation:** Everyone in the team is somewhat comfortable with using the both.

**(A→B) Plan to get there:** I can help Felix show how to use GitHub and Android Studio so that everyone learns quicker.
