

## SEVENTH WEEK

- What do I want to learn or understand better?

How to write better code, we have planned to refactor the code this sprint. And because of that i want to improve my skills to write better code. To do this I will look at my own code and compare with others, add comments and look online for help. I will also ask others for help.

- How can I help someone else, or the entire team, to learn something new?

If I find good help online I can share it with the group, also help others if they have less experience than me.

- What is my contribution towards the team's use of Scrum?

Taking more charge is what I've done the last couple of weeks which results in the meeting being shorter.

- What is my contribution towards the team's deliveries?

By doing my work on time, this week I feel like I can get my work done faster so the other members can review in time and also make me more available to help with the others' problems.
