

## Individual Reflection

Week 8

Felix Oliv

What do I want to learn or understand better?

### **Current situation**

We are at the end of the project and there is not that much more that I want to learn.

### **Goal**

I do want to hear from the other team members how they think this agile process is and if they think it's a good or bad way of working.

How can I help someone else, or the entire team, to learn something new?

### **Current situation and goal**

This week is mostly about bug fixing which means that it's hard to know what people will need help with. But since I have coded a lot of the model and database I will be able to teach them how those parts work.

### **Plan**

Same as last week.

What is my contribution towards the team's use of Scrum?

### **Current situation**

I helped with assigning estimation of effort and story points for this week's user stories, I also tried to create smaller tasks of my user story and also updated them on the trello board whenever I'm done with a task or acceptance criteria.

### **Goal and plan**

The goal is to be as active as possible on trello so that you can easily follow the progress that is being made. Specifically removing bugs that I have fixed and moving those I am currently working on so that we don't work on the same bugs.

What is my contribution towards the team's deliveries?

This week I was assigned to be working on fixing the most important bugs that the app had. As I said before I'm the main person that coded the model and especially the database so that's where I spent most of my time. I also helped almost everybody else with small stuff that they couldn't figure out, for example we couldn't always find the source for a bug so we got together to try and figure it out.
