

- 1. what do I want to learn or understand better?
 - 2. how can I help someone else, or the entire team, to learn something new?
 - 3. what is my contribution towards the team's use of Scrum?
 - 4. what is my contribution towards the team's deliveries?
-
1. I want to learn more theory of how programming of android applications should be done because during this first week it has felt like writing in a new programming language because of how many new terms etc. there have been to grasp. A simple way of speeding up the learning process would be to watch videos online on the basics of android studio for starters.
 2. Seeing as I myself have been rather overwhelmed by my own lack of understanding of the new programming environment I do not see anything that I can do to help someone else learn something.
 3. Barely anything this split since I was sick.
 4. Seeing as how I was sick for the entire week I only managed to deliver a button for navigation and a part of an information card for the challenge page.
