- 1. what do I want to learn or understand better?
- 2. how can I help someone else, or the entire team, to learn something new?
- 3. what is my contribution towards the team's use of Scrum?
- 4. what is my contribution towards the team's deliveries?

1. I want to learn more about resolving merge conflicts. At the moment I feel like I would accidentally screw up the entire repository if I tried to merge to branches with conflicts. A good way to improve at this is to be present when someone who knows what they are doing merges two branches, in other words watch and learn. I have already started doing this so progress should be made.

2. For a task that I have a good understanding of how it could be done, that someone else is going to do but have less experience with, I can walk them through how I would have approached and done the taskthoroughly.

3. I made sure that the scrum board was a tidy and effective as possible to easily track the progress of the sprint.

4. I resolved a lot of bugs that were caused by the integration of the online database.
