FIRST WEEK

- what do I want to learn or understand better?

  I want to learn how to be a highly productive and functioning part in an IT project. Today I think of myself as a well functioning participant in IT projects but want to push myself further. I can reach this goal by contributing more and working on my cooperation skill.

- how can I help someone else, or the entire team, to learn something new?

  If I feel there is something I could teach, I can take action and actually make myself heard teach it. Today i think i am ok at taking action in these moments. To be better at it I could be more mindful and notice when I possess knowledge that could help and learn someone else.

- what is my contribution towards the team's use of Scrum?

  We have not started this yet.

- what is my contribution towards the team's deliveries?

  I have participated in the deliveries we have done so far, even though the project has not really started yet we have discussed social contracts and project ideas and I feel I have contributed.
