THIRD WEEK

- what do I want to learn or understand better?

  This still stands.

  I want to learn how to be a highly productive and functioning part in an IT project. Today I think of myself as a well functioning participant in IT projects but want to push myself further. I can reach this goal by contributing more and working on my cooperation skill.

- how can I help someone else, or the entire team, to learn something new?

  If I feel there is something I could teach, I can take action and actually make myself heard to teach it. Today I think I am ok at taking action in these moments. To be better at it I could be more mindful and notice when I possess knowledge that could help and teach someone else.

- what is my contribution towards the team's use of Scrum?

  I have actively participated in scrum meetings and worked to create user stories for the scrumboard and worked with a teammate to deliver our user story. I have tried to follow the plan. I want to contribute more in future work and will do so.

- what is my contribution towards the team's deliveries?

I have participated in Team reflection and helped by starting the first user story together with a teammate and i have tried to teach what i know about android studio, I have discussed design choices. I want to contribute the same if not more next week. I will do this by spending more time and putting in more of an effort.
