- 1. what do I want to learn or understand better?
- 2. how can I help someone else, or the entire team, to learn something new?
- 3. what is my contribution towards the team's use of Scrum?
- 4. what is my contribution towards the team's deliveries?

1. I want to improve on estimation of effort because during the workshop we either overshot or undershot by roughly ½ - 1 sprint. The plan here would be to more extensively break down the user story into smaller more easily digestible increments in order to more accurately estimate the effort needed for completion.
2. Since two group members have not worked with version control systems such as github before I could make sure to answer any questions they might have.
3. When it comes to the team's use of Scrum all that has been done so far is to set up a trello page for us to eventually fill with user stories etc. When we do, I will do my best to make sure we utilize it in the best way possible.
4. I set up an initial sketch to base the mockup on and then further developed it. I also participated and exchanged ideas for the business model and project scope.
