SIXTH WEEK

- What do I want to learn or understand better?

To code more modularly, with one class working it is easy to add mode components without having to do much work.

- How can I help someone else, or the entire team, to learn something new?

As every week, I want to help others. I can be more helpful by asking the others how they are doing in the weeks, havenät done that yet but will do it later on.

- What is my contribution towards the team's use of Scrum?

Helping assign different values of Estimation of effort and Story points to user stories and, as every week, doing my user story. Taking more charge is what I've done the last couple of weeks which results in the meeting being shorter.

- What is my contribution towards the team's deliveries?

By doing my work on time, this week I feel like I can get my work done faster so the other members can review in time and also make me more available to help with the others' problems.
