Individual Reflections - Week 9

What do I want to learn or understand better?

(A) **Current Situation:** The minimal viable product is finished, and we have fixed all the bugs that occurred upon merging pull requests. Onwards, I would like to learn how the connection between the database and application works. How to create a database and then build the application on it so that there will be no bugs when working with the application and database. I will also continue to learn how to efficiently work in agile projects and how I can contribute for seamless sprints and teamwork.

(B) **Desired Situation:** I understand how the database works and can work in agile projects.

(A→B) **Plan to get there:** Watch a tutorial on how databases work and use what I learned from this course when I work in agile projects in the future.

How can I help someone else, or the entire team, to learn something new?

(A) **Current Situation:** The team mainly focused on fixing their own bugs and therefore I could not help anyone or teach them something new.

(B) **Desired Situation:** Everyone understands my code and can learn from it.

(A→B) **Plan to get there:** Write readable code with explaining java docs so that it´s easier for others to understand my code and therefore follow and learn from it.

What is my contribution towards the team's use of Scrum?

(A) **Current Situation:** This week was focused on fixing bugs and therefore there were no assignment of story points or estimation of effort. However, I made sure to write down all bugs I could find in the scrum board so that the team knows what bugs need to be fixed.

(B) **Desired Situation:** The scrum board is organised and up to date with relevant information.

(A→B) **Plan to get there:** Make sure to update the scrum board after working with something and write down all bugs and specific information in the scrum board.

What is my contribution towards the team's deliveries?

(A) **Current Situation:** This week I was assigned to fix some bugs and I have completed my task in time and helped others fix their bugs too.

(B) Desired Situation: I complete my tasks in time and make sure that the others also do it.

(A→B) Plan to get there: Start working early and if there is time over, help others or take the initiative to fix more bugs.
