Individual Reflections - Week 8

What do I want to learn or understand better?

(A) **Current Situation:** I have created an explore page where the user can browse all the challenges and join them. The page can filter the challenges after the user's input. However there seems to be some bugs with the filtering that I need to fix. So, I would like to learn more how to efficiently filter a list.

(B) **Desired Situation:** The filter right and efficiently.

(A➔B) **Plan to get there:** Look up how to filter a list and learn from others on how to filter efficiently.

How can I help someone else, or the entire team, to learn something new?

(A) **Current Situation:** Elin W and Viktor W are supposed to create an adapter class for the profile page next sprint. I recommended a video that shows how to do it and if they have some questions then they can always ask me.

(B) **Desired Situation:** Elin W and Viktor W successfully create an adapter class for the profile page where it can show a list of the users' friends.

(A➔B) **Plan to get there:** Send them the video and be there to help if they need anything.

What is my contribution towards the team's use of Scrum?

(A) **Current Situation:** I have continued updating and working with the scrum board as before. There are now more bugs all over the application and our team have decided to write them down in Discord and focus on fixing them next sprint so that we have a bug-free minimal viable product.

(B) **Desired Situation:** All bugs are known so that we know what we need to fix.

(A➔B) **Plan to get there:** Use the application and write down all the bugs in Discord.

What is my contribution towards the team's deliveries?

(A) **Current Situation:** I have kept up my work and delivered my tasks in time.

(B) **Desired Situation:** I keep up the work.

(A➔B) **Plan to get there:** Work the same and keep it up this way.
